INFRASTRUCTURE HEALTH CHECK

GalaxE infrastructure health check encompasses your entire network and provides you with a single source of truth on the health of your network systems. This current state network 'snapshot' and third party validation of all servers, systems and network appliances, can work as a guiding principal, industry benchmark, and road map to ensure you are audit ready and more.

INDEPENDENT INFRASTRUCTURE AUDIT READY
HEALTH CHECK CURRENT STATE ANALYSIS AND INVENTORY

REDUCE TCO
asset and inventory control system review and gap analysis report
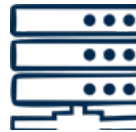

CATALOG APPLICATIONS
address license concerns and all application security and software provisioning

ASSET APPLICATION SECURITY
information security, audit, penetration testing, cybersecurity

managed cybersecurity service provider - flexible team configurations

Managed security service provider – security operations center (SOC) partnership

cybersecurity consulting and assessment - annual program review and report
