(status reporting/dispute resolution)
- Bid and proposal

## Capabilities

- Portfolio management
- Program and project management
- Resource management
- Time tracking
- Risk and issue management
- Financial management

## Day One Business Benefits

### Business Objective Focused

The success of the project is marked by the achievement of the key business objectives

### Risk Attentive

Risk management is ongoing and dynamic - resulting in higher success probabilities

### Performance-Driven Success Management

Success is measured by agreed upon and quantifiable results

### Date/Decision-Driven Project Execution

The enablement of data-driven decision making in our delivery model leads to higher levels of transparency, reduced risk and higher success rates

### Holistic and Integrated View

Projects are managed and evaluated individually as well as based on their contribution to the portfolio - it is more than days, dollars and deliverables

### Resource Utilization

The effective utilization of client resources is prioritized and managed

### Automation Enabled - Tactical to Strategic

The use of automation will drive SMEs to focus on value-driven activities versus administrative activities

### Co-Location Advantage

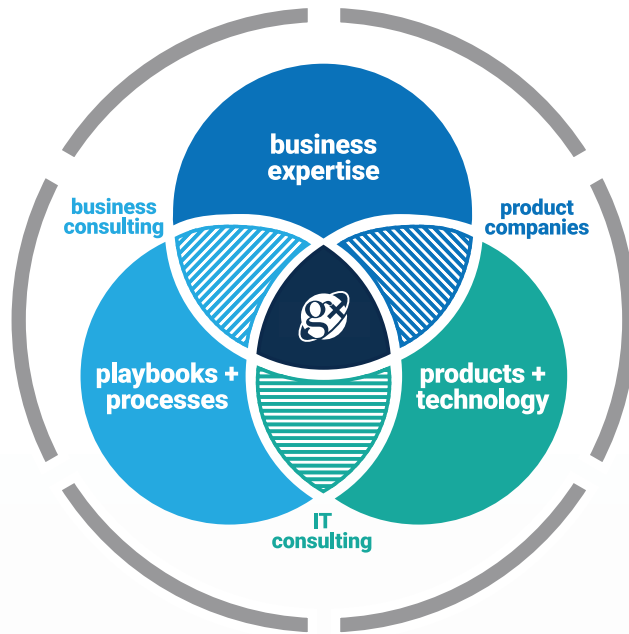

With many locations around the globe, we are always nearby and can co-locate in your office

### Communication Excellence

GalaxE's project professionals streamline communication between business and IT, drive collaboration and accountability, and bring creative new ideas to expand your portfolio

### Tools Diversity

We have experience with Planview, Planisware, Agilecraft, JIRA and more

### SDLC Experience

GalaxE provides careful guidance in the areas of SDLC, compliance, regulatory and emerging technologies

### Partnership Experience

We build long-term relationships - over 90% of our clients are repeat engagements

### Skills Diversity

Program Managers, Portfolio Managers, Project Managers (PM), Delivery Managers, Operations Managers, PM + Scrum Master, PM + Business Analyst, PM + Product Analyst
