

gxp|prime™

Automated Portfolio, Program
and Project Management
Patent-pending

The GxPrime™ platform includes a family of services that supports software development and enables engineering for speed to value. GxPrime™ enables you to engineer high quality solutions quickly and reliably by using the right processes and tools to meet the needs of your business and increase your speed to market.

Automated Portfolio and Project Management

GalaxE's Enterprise PMO service delivery for programs of any size, leveraging automation of tools leading to effective and efficient implementations. The focus of providing information to strengthen the ability of holistic decision making and management is the key principle behind GxPrime™, enabling you to apply consistent and repeatable methods and levels of rigor across the development lifecycle.

Key features of GxPrime™ include:

- **Risk Management** – Mitigate delays or defect risk to achieve consistent quality
- **Defect Identification** – Spot defects before deployment, eliminating the need to revisit applications later - up to 20% reduction in defects and reduced rework
- **Increased Speed to Market** – Facilitate rapid speed to market, including the ability to get a full, clear and consistent understanding of business needs before software development starts with a complete list of lifecycle deliverables
- **Introduction of Standardization** – Enable a repeatable process by incorporating industry standards and introducing a simplified, more scalable and standardized process in line with industry best practices and measurable against your business objectives
- **Demand Management** – Configurable feature that is a core enabler of regulations into the business processes within the organization
- **Application Inventory** – Covers end-to-end lifecycle of IT systems starting from determination of applicable regulations to operational support by enforcing process adherence through the project execution and stage gate assessments

Points of value:

- Superior integration into existing platforms
- Maximize on-time delivery performance
- Reduce decision making and driving improved time to market

To unleash the full power of GxPrime™, use with:

gx|quality + **gx|engage**

GxPrime™ - Engineering speed to value.
